-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

1. The drawing is objected to under 37 CFR 1.84 (p)(s) since numeral 17, page 5, line 7, is not in the drawing. Correction is required. The introduction of new matter should be guarded against.
2. In the specification, page 4, line 28, "bottom 34" should be changed to --bottoms 35--.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Arnold.
Note pads 22 in Arnold, figures 1 and 1A.

Regarding the recitation of structures being removably attached, any structures can be separated. Note applicant's claims do not recite means for readily attaching and detaching his elements.

Regarding the tangent arrangements set forth in the claims, pads 22 rotate to an inoperative position above the bucket bottom.

Regarding claims 9, 11 and 12, note 41 in figure 2A of Arnold is at an acute angle with 40.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3652

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Confoey in view of Lakin et al.

It would have been obvious to one having ordinary skill in the art at the time of applicant's invention to provide pads as claimed on the bucket support surface shown in figure 4 of Confoey in view of the teaching in Lakin (structure 48) to minimize damage to the support surface during use and to provide better gripping.

7. Any inquiry concerning this communication should be directed to D. Underwood at telephone number (703) 308-1112.
